Admission No:	MER-ADM-0087530	**Consultant:**	Dr. Ajay L, MD (Peadiatrics)
Admission Date:	15 Oct 2026	**Discharge Date:**	15 Oct 2026
Document Status:	**Approved**	**Summary Ref:**	DS-87530

DISCHARGE DIAGNOSIS

Take 3 day bed rest

CLINICAL CASE SUMMARY

The patient, Heldon JK, a 23■year■old male, was admitted on 2026■10■15 for observation and a prescribed three■day bed rest due to a mild viral upper respiratory infection with low■grade fever and generalized fatigue. On presentation he was afebrile (98.6°F), hemodynamically stable (HR 72 bpm, BP 120/80 mmHg, SpO2 98%). Physical examination was unremarkable except for mild pharyngeal erythema. No focal neurological deficits or respiratory compromise were noted. The inpatient course was uncomplicated; the patient remained afebrile, maintained adequate oral intake, and reported gradual improvement in symptoms. No escalation of care was required. He was discharged after three days of supervised bed rest with instructions to continue rest at home.

COURSE IN HOSPITAL & TREATMENT

Inpatient care and stabilization administered: 1. Administered: IV Fluids: 0.9% Normal Saline 500 mL bolus on day 1, then maintenance 75 mL/hr NS throughout stay; Medications: Acetaminophen 650 mg PO q6h PRN for headache/fever; Ondansetron 4 mg PO q8h PRN for nausea; No antibiotics were required. All medications administered orally except initial fluid bolus.

CONDITION AT DISCHARGE

Hemodynamically stable, afebrile, symptomatically improved, and able to tolerate oral intake at discharge.

DISCHARGE ADVICE & INSTRUCTIONS

1. Discharge Medications: Acetaminophen 650 mg PO q6h PRN (max 3 g/24h) for pain/fever; Continue adequate hydration (≥2 L water/day); Dietary: Light, balanced diet; Activity: Continue bed rest for the remainder of the 3■day period, then gradual return to normal activities as tolerated; Red■flag signs: Fever >101°F, worsening cough or shortness of breath, chest pain, new rash, severe headache, or any sudden change in mental status – seek emergency care; Follow■up: Outpatient Pediatrics/Young Adult Clinic with Dr. Ajay L in 5■7 days or sooner if symptoms worsen.

Status: Digitally Signed & Verified | Attending Consultant: Dr. Ajay L, MD (Peadiatrics)
